

The **California Space Authority State Political Action Committee (CSA State PAC)** is a voluntary, non-partisan entity committed to improving and protecting the space enterprise community in California. The CSA State PAC will allow stakeholders to combine political contributions so we can identify and support candidates for elected office who recognize the importance of space enterprise.

When you contribute to the CSA State PAC, you help ensure the space sector's involvement in the decision making process. Those elected to office make decisions that affect space enterprise and our interests. By working together to elect people who value the space enterprise community, we will have set the stage for positive outcomes.

CSA's state lobbying efforts, paid for by CSA membership dues, are separate from contributions made to political candidates through the CSA State PAC. Only through the CSA State PAC can we support state elected leaders who are friends of CSA and the space enterprise community. We hope you appreciate the need for the CSA State PAC and join with your colleagues by making a contribution to this fund. Please be as generous as you can afford.
